

I travel on business weekly and have for several years. I carry a listing with me of stations that carry the K-LOVE broadcasts and use this to find a station where I know I'll find helpful, encouraging music, news and talk. I believe that K-LOVE's broadcast is in the public interest both because it provides helpful, encouraging, music, news and talk and because it provides information about events of local interest. I appreciate the ability to listen to this station in so many of the cities to which I travel and that encouraging, promoting, and supporting such service should be a mandate of the FCC. Stations where one can be certain to not find hateful, harmful, or distasteful talk or "music" are few and far between. When one is looking for a station one can listen to safely, particularly with children, K-LOVE is a welcome refuge on the radio dial. Thank you for the opportunity to submit these comments.
